Training objectives

This training provides you with a thorough overview of Check & Connect and its background and how to prepare your site for implementing Check & Connect.

Learn and understand —

- The core components and elements of C&C;
- The context for C&C, including the process of disengagement and the risk factors associated with dropping out;
- How C&C was developed, its theoretical underpinnings, and its evidence base; and
- Steps for preparing for and implementing C&C at your site, from aligning Check & Connect with current initiatives through program evaluation.

Who should attend

This training is designed for education administrators and lead staff (decision-making stakeholders) interested in preparing for and implementing C&C. Note that this training is not intended for C&C mentors.

Training materials

Participants receive a copy of the Check & Connect manual, printed resource materials, and access to electronic implementation forms.

The Check & Connect implementation manual walks readers through the Check & Connect implementation process, outlining the key components, describing the steps of implementation, and presenting the underlying theories and research, including

the four types of student engagement (academic, behavioral, cognitive, and affective) and the importance of intervening both directly with students and indirectly through enhancing students' home and school contexts. Additionally, the manual provides guidance on options for implementing Check & Connect with fidelity to its principles and strategies, while also responding to local school and community contexts.

Training Fee

\$325 per participant, or **\$295** if registering by early bird deadline.

(See website for registration deadlines.)
