Implementing with Fidelity

CHECK & CONNECT
A comprehensive student engagement intervention

Implementing with Fidelity

INSTITUTE on COMMUNITY INTEGRATION

Preface ........................................................................................................................................... i
   A bit of history .......................................................................................................................... i
   Introduction .............................................................................................................................. ii

Section 1: About Check & Connect ...................................................................................... 1
   What is Check & Connect? ....................................................................................................... 1
   Descriptive characteristics .................................................................................................. 2
      Characteristic one: A targeted or intensive intervention / 2
      Characteristic two: A structured mentoring intervention / 2
      Characteristic three: An empirically supported intervention / 2
      Characteristic four: Clearly delineated elements / 4
   Theoretical underpinnings .................................................................................................. 5
   The theory of student engagement ..................................................................................... 6
      How is student engagement conceptualized in Check & Connect? / 6
   The logic model .................................................................................................................. 8

Section 2: The role of the mentor ......................................................................................... 11
   The role of the Check & Connect mentor .......................................................................... 11
      Who can serve as a Check & Connect mentor? / 11
      Why the name “mentor”? / 12
      What are the personal characteristics of an effective Check & Connect mentor? / 12
      What does the Check & Connect mentor do? / 12
      How does the Check & Connect mentor build relationships with students on his/her caseload? / 15
      How does the Check & Connect mentor fuel students’ academic motivation? / 17
      What is not part of the Check & Connect mentor’s role? / 19

Section 3: Implementing Check & Connect ......................................................................... 21
   What are the steps for implementation? .............................................................................. 21
      Preparation stage / 21
      Implementation stage / 21

Step 1: Determine indicators of student disengagement .................................................... 21
      What are the indicators of student disengagement at your school? / 21
      Create a common understanding and shared language about status and alterable risk factors / 22
      Create a common understanding and shared language about risk and protective factors / 22
      Learn the engagement subtypes / 23

Step 2: Identify students at risk of disengagement or dropout ......................................... 24
      Who are the target students at your school? / 24
      Identify the target students / 24
      Check for high-risk student groups / 26
      Determine prevalence of and capacity to serve the target population / 26
      Complete intake form / 27
      Create a monitoring form / 27
      Determine risk criteria in the context of your school / 28
Step 3: Select or hire mentors
Who will serve as mentors? / 31
Desirable characteristics of mentors / 31
Helpful guidelines for the interview process / 31
Considerations for staffing the position with existing school personnel / 33

Step 4: Organize existing resources for intervention
What resources exist in your school and community? / 34
Identify resources / 34
Avoid role confusion for the mentor / 35

Step 5: Get to know students, teachers, and parents
How is Check & Connect introduced? / 36
Introductions to the target students / 36
Getting to know the target students—over time / 37
Introductions to parents / 38
Communicating with teachers / 39

Step 6: Use “check” procedures and the monitoring form
How is student performance monitored? / 40
Guidelines for successful “checking” / 40
Instructions for completing the Check & Connect monitoring form / 41
Guidelines for interpreting student data / 42
Determining the need for basic or intensive interventions / 44

Step 7: Implement “connect” interventions
What are personalized, data-based interventions? / 47
Defining features of “connect” interventions / 47
Examples of “connect” interventions commonly used by mentors / 48
Maximizing finite resources through two levels of intervention / 50
Various categorizations of “connect” interventions / 52
Guidelines for selecting intensive interventions / 54
Core strategies of “connect” interventions: Problem solving and goal setting / 54
A continuum of goal setting: Attend-Engage-Invest / 62

Step 8: Strengthen the family-school relationship
How do mentors engage with parents? / 64
What does “parent engagement” mean? / 64
Guidelines for engaging with parents / 65
Building a trusting family-school relationship / 67
Strategies to engage with parents and enhance parental participation / 70
Providing persistent outreach to parents / 75

Step 9: Monitor the person-environment fit
Why attend to the person-environment fit for the target student? / 75
The effect of existing school and family practices / 76
Examples of classroom practices to enhance student engagement / 77
Monitoring the impact of intensive interventions / 77

Step 10: Provide mentor support and supervision
What is the role of the coordinator? / 78
Who has served as coordinator? / 78
What are the main functions of the coordinator? / 79

Step 11: Evaluate program implementation
What is the impact of Check & Connect at your site? / 81
Determining the purpose of your evaluation / 81
Describing your school and students / 82
Assessing fidelity of implementation / 82
Determining program impact / 83
Section 4: Implementing Check & Connect with fidelity .................................................. 85

What are the critical considerations for fidelity of implementation?.................................................. 85
  Establishing competence in implementation / 85
  Summer implementation / 85
  Using the name “Check & Connect” / 86
  Fidelity of implementation at your site / 86

In closing .................................................................................................................................................. 88
  Check your understanding of Check & Connect / 88

Section 5: Appendices........................................................................................................ 89

Appendix 1. The theoretical and empirical bases for the core elements of Check & Connect................. 90
Appendix 2. Check & Connect referral form ......................................................................................... 94
Appendix 3. Check & Connect student intake form ............................................................................. 95
Appendix 4. Check & Connect strengths-based student interview ....................................................... 97
Appendix 5. Check & Connect elementary school monitoring form .................................................... 99
Appendix 6. Check & Connect middle school monitoring form ............................................................ 101
Appendix 7. Check & Connect high school monitoring form ............................................................... 103
Appendix 8. Potential interventions: Risk indicator by engagement subtype ....................................... 105
Appendix 9. Guidelines for goal setting ............................................................................................... 118
Appendix 10. Examples of teacher interventions by engagement subtype ......................................... 120
Appendix 11. Check & Connect core components and elements self-assessment .................................. 128
